

**Flexibilní rýhovaný ventilační potrubí**

PE-FLEX Spectra 1000

Flexibilní ventilační potrubí s vlnitou strukturou a nejlepšími antibakteriálními a fungicidními vlastnostmi, až téměř 100%. Vyrobeno z nejvyššího plastu PE-HD s největšími rozměry o průměru 50, 75 a 90 mm.

Antibakteriální a protiplísňová vnitřní vrstva potvrzená testovacími certifikáty, s téměř 100% biocidní účinností, chrání potrubí před akumulací nežádoucích mikroorganismů, které jsou pro člověka nebezpečné.

Dvouvrstvá konstrukce potrubí zajišťuje vysokou pevnost v tlaku a umožňuje zalít potrubí do konstrukčního betonu nebo uložení do izolační vrstvy stropu.

Vysoká flexibilita potrubí výrazně usnadňuje instalaci volným tvarováním, ohýbáním a vedením potrubí bez potřeby dalších tvarovek.

Vnitřní vrstva má antistatické vlastnosti, které omezují usazování a hromadění prachu v trubkách a navíc hladký povrch usnadňuje čištění.

Trubky jsou zcela bez zápachu.

Trubky mají třídu reakce na oheň D-s2,d2.

Výrobek má hygienický certifikát vydaný Polským státním ústavem veřejného zdraví.
